

Turnkey waste management solutions

Documentation and record keeping are fundamental elements to a waste management program. In addition to being necessary and useful for the generator, they are required by the federal government in order maintain compliance.

Danox Environmental Services, Inc. is equipped to alleviate the burden of managing all of the paperwork that accompanies waste transportation and disposal. As a detailed-focused company, we deliver accurate and comprehensive record keeping for our clients. We believe this data should be readily retrievable and accessible at a moment's notice.

Danox supports the tracking of all material from "cradle to grave" and the delivery of detailed, custom reports for our clients.

Pre-shipment services include:

- Profile assistance and completion
- Printed manifests
- Printed labels
- Land Disposal Restriction (LDRs)
- DOT hazard stickers and placards
- Client/customer specific documents

Post-shipment services include:

- Certificates of recycle/destruction
- Client/customer specific documents
- Bi-annual EPA reporting
- Toxic Release Inventory (TRI) reporting
- Monthly/quarterly/yearly waste reports
- Sustainability reports

Audit Support Services

During a regulatory audit inspection, you can feel confident in having accurate and readily available shipping history and data. We archive all shipment records so that we can quickly access the data and paperwork when you need it.

Our staff of professionals, which include Certified Hazardous Material Managers (CHMMs), are ready to deliver accurate and timely documentation for all of your pre and post shipment needs.
