

Comprehensive Waste Management Solutions

Danox Pharmaceutical Services specializes in managing and ensuring secure, witnessed destruction of DEA controlled substances, as well as proper disposition of hazardous and non-hazardous finished goods and manufacturing wastes. Our team has years of experience managing the destruction of all schedules of controlled substances (C-I thru C-V).

Program Highlights

- **Danox specializes in product destruction:** We are not a returns company; our business is destruction. You can depend on our knowledgeable insight to waste management.
- **National destruction capability:** Danox has DEA-approved incineration and destruction capacity throughout North America.
- **Witnessed destruction:** Danox offers complete witnessed destruction services. Our personnel includes trained police, security and Certified Hazardous Materials Managers (CHMM).
- **Inventory management:** Danox will verify National Drug Codes (NDCs) and reporting quantities. We will also document tracking identifiers to ensure proper reporting and compliance.
- **Forms completed:** Danox takes the lead in profiling your material into our facility. We provide DEA 222 & 41 forms, controlled waste forms (CWFs) and DOT shipping paperwork.
- **Reduced customer liability:** By taking possession of your DEA material at your loading dock, Danox eliminates the need for your personnel to go off-site as well as limits your internal costs associated with arranging and witnessing your own materials destruction.
- **Validated waste management partners:** Through our stringent security agreements and audits, we fully approve our transportation and destruction partners to ensure that our Danox DEA approved protocols will provide you with seamless transfer and destruction of your waste.
- **Experience and expertise:** Danox has over 75 years of combined experience in supporting generators with EPA-compliant solutions.
