

## Turnkey waste management solutions

Solvents are in high demand and depending on the type of solvent that you work with, there could be tremendous value to your virgin, used, waste or by-product solvent streams. The opportunity to recycle or reuse your solvents has many benefits.

We can provide many different methods to process solvents frequently used at your facility. Danox Environmental Services, Inc. can purchase the solvents, FOB your property for direct reuse in the commercial industrial solvent market, or we can provide a tolling service for your material, so the material can be reused at your own facility.

There is no volume too small to recycle or reuse. We handle shipments in rail cars, tanker trucks, and drums. The value of your solvent is dependent on the type of solvent, contamination, and market driven factors for the specific material. We will review samples of your product and perform analysis at no charge to you in order to net the most value for your company.

The process to turn your solvent into a profitable stream is easy:

1. Contact Danox Environmental Services
2. Discuss your stream with one of our professional staff members
3. We provide a purchase rate
4. Schedule all logistics
5. Provide all shipping paperwork
6. Provide payment for the material
7. Provide a "Certificate of Recycle or Reuse"

Take advantage of sourcing your material with the professionals that purchase solvent waste streams at Danox Environmental Services. We stand ready to provide an alternative outlet for all of your materials. There is nothing to lose and everything to gain by discussing your materials.

## BENEFITS

Meets Company Sustainability Initiatives

Reduces Hazardous Waste Generation

Provides Profitability to a Liability

Reduces Project Costs
