

Turnkey waste management solutions

Danox professionals provide DOT oversight to our customers supporting DOT guideline compliance for legal transport of hazardous materials and hazardous waste. We have over 75 years experience supporting customers with turnkey management solutions, without ever having a single DOT issue.

DOT compliance is an important aspect to a proper product and waste management program. Improper packaging, paperwork, placarding or transport can lead to Notice of Violations (NOV's) and fines for the shipper on record. Shipper responsibilities, outlined in 49 CFR Part 173 include:

- Shipping papers
- Proper shipping names
- Class/division
- Identification number
- Hazard warning label
- Packaging
- Placarding
- Employee training
- Emergency response telephone number
- Determine whether a material meets the definition of a "hazardous material"
- Emergency response Information
- Shipping papers
- Certification
- Compatibility
- Blocking and bracing
- Marking
- Security plan
- Incident reporting

National network of DOT approved Transporters:

Danox transportation vendors go through a thorough vetting process that includes:

- Review of permits: Federal and State Requirements for HAZMAT, Hazardous waste and Special waste
- Review of insurance: MCS 90 levels for HAZMAT
- Training and compliance program: Training and review required every 3 years
- Safety and incident review: 0 tolerance for non compliance

Paperwork management services:

- Bill of lading
- Non hazardous waste manifest
- Stickers
- Hazardous waste manifest
- Label
- Placarding
