

Turnkey waste management solutions

As the focus on sustainable results continues to grow within the corporate environment, we have worked hard to develop options to **deliver alternative solutions** for your waste disposal requirements.

We offer a technology-proven process that produces **engineered waste derived fuels**. This method incorporates the intrinsic values of multiple waste streams in order to **create a fuel source** that is used as an alternative to fossil fuels. This option, as compared to waste-to-energy, landfill, or straight incineration, delivers a true green processing technology for your waste disposal.

Acceptable waste:

- Adhesives
- Carpet
- Oils
- Fiber
- Consumer products
- Auto fluff
- Plastics
- Toner
- Banbury sludge
- Fragrance
- Cardboard
- Paint
- Industrial waste
- Soap
- Debris
- Glue

Our processing facility is able to accept **all types of shipping containers** including:

- Cubic yard boxes
- Poly drums
- Bulk liquids
- Steel drums
- Palletized products
- Walking floor trailers
- Fiber drums
- Totes
- Roll-off containers

Our staff of professionals, which include Certified Hazardous Material Managers (CHMMs), are ready to deliver a turnkey disposal and recycling solution for all your waste streams.

KEY ADVANTAGES

0% Landfill – No Ash Residue

High Temperature Destruction

Reduced Liabilities

Proven Process

Indemnification

Competitive Pricing

Brand Protection

Recycling for Fuel
